

SWIFTSPACE SWIFTWALLS

From initial drawings, to flat pack, Swiftspace SwiftWall is an excellent solution for single or multiple vaccination stations. Add in a Swiftspace Unify 24 x 36 Fliptop table and chairs the workspace is complete.

- Right now the need is for vaccination stations but, these walls can be reconfigured for treatment or triage rooms at a later date.
- Configure it your way. Each set can be easily reconfigured to create T-walls or L-walls or any other configuration you need. L shaped configurations can be easily added to create multiple rooms.
- Walls come standard with adjustable height glides. Casters are available as an upcharge.
- Ship flat-packed so they can easily be stored until they are needed (can also be stored between uses, freeing up floor space)
- Panels can be switched out for a change of material or replacement without having to disassemble the whole 'Room'
- Walls are ganged together top and bottom with an easy to remove bolt. See assembly video link below
- Images/logos can be easily added to the panels using printed Vinyl decals. Pricing is available upon request

Back Panels are 66"Wx66H" white 6mm PVC foam core - making these panels washable. Sides Panels are 48"Wx66H" white 6mm PVC foam core - making these panels washable

Skid is 4x8x5 approx. 900lbs
