**TRACKING AND IoT SOLUTIONS
FOR INSIGHTFUL MANAGEMENT OF
OFFICE AND INDUSTRIAL ASSETS
AND PERSONNEL**

Real-time location and situational awareness of assets and people

TRACKER^{IoT} SOFTWARE PLATFORM

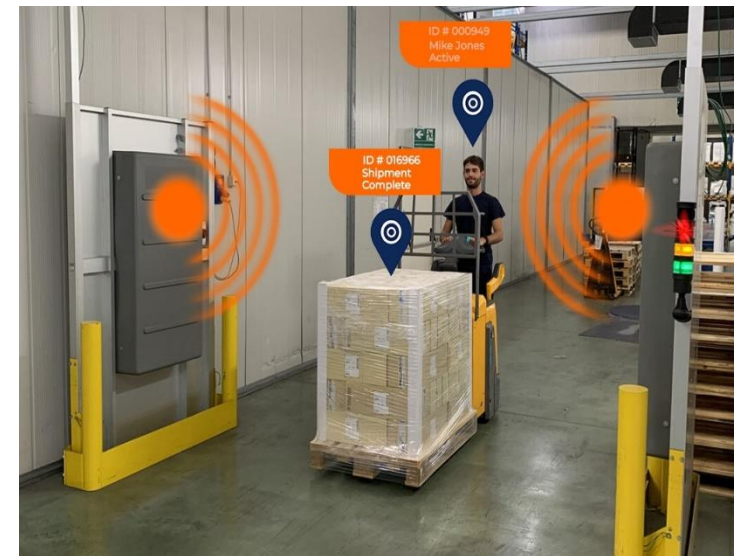

Tracker^{IoT} is your command center for managing the location and status of assets and people, and is rapidly configurable for your exacting data, tracking, workflow, security and reporting requirements. Successfully deployed solutions since 2006.

- Your IT department will like the Tracker^{IoT} technology platform...it is developed with most-current, sustainable software components
- Tracker^{IoT} is fully developed and ready for deployment, including all features and functions delivered previously for our global commercial, government, military and police clientele since 2006
- Enables integration with your backend database management applications, for real-time data synchronization
- Supports industry-leading tracking technologies including barcodes, UHF RFID, UWB, LoRaWan, Bluetooth, GSM, GPS and 5G
- Supports a full spectrum of security technologies including alarms, lights, access control, cameras and intrusion detection

TRACKING, SENSOR & SECURITY TECHNOLOGIES

Tracker^{IoT} supports industry leading manufacturers of tracking, sensor and security technologies, including being a Zebra certified partner...the top tracking and sensor technology manufacturer globally.

- Support for multiple technology capabilities are often required for an enterprise to leverage the benefits of location and situational awareness across the various sectors of their business
- Tracker^{IoT} provide an integrated solution platform that supports a wide array of best-of-breed vendors and technologies
- Our team's prior experience spans a wide range of industries and applications, including many governments and leading commercial organizations with diverse tracking and security requirements
- Supports barcoding, UHF RFID, long-range RFID and GSM/GPS tracking technologies to ensure that you attain best results and performance

TURNKEY SOLUTIONS

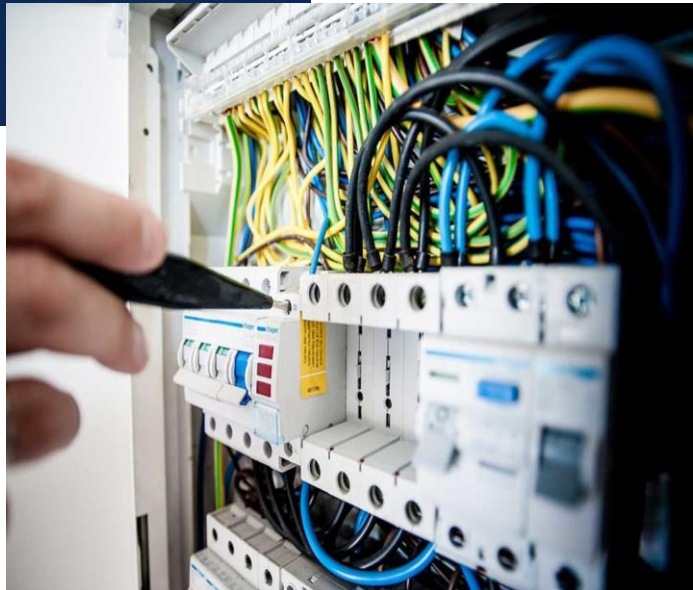

TrackingSystems^{IoT} provides turnkey solutions including software, professional services, hardware, installation and training. Our global network of reseller partners provide local expertise and services for cost effective deployments.

- Project's start with customer-vendor collaboration to establish a project plan for all aspects of a project's deployment, including complete software and hardware design, specifications and physical layout
- Tracker^{IoT} software is configured to your exacting requirements, based on your inputs, and the software is iterated until you are fully satisfied with its performance and approve its implementation
- Your existing data is populated to Tracker^{IoT}, labels and tags are provided and Tracker^{IoT} is integrated with your backend database(s).
- A complete Bill-of-Materials is comprised, including all hardware and accessories required to fulfill the solution's architecture.
- Users and IT staff are fully trained on all aspects of the system's usage and the system's internal ongoing support.

ONGOING SUPPORT

Tracker^{IoT} solutions are fully supported by TrackingSystems^{IoT} and are reinforced through our local reseller close to you, and with extended warranty and advanced on-site service through our hardware vendors.

- User support and ongoing training as required to ensure that staff are optimally utilizing Tracker^{IoT}
- IT support and ongoing technical knowledge transfer to ensure that the system stays up and running for the long-term
- Periodic server stack and application software updates to ensure that you have our latest software features and technology components
- Manufacturer hardware warranties and extended onsite maintenance of hardware, with repair-or-replace of non-performing hardware
- Our success is measured by your success...we are here to support you!

EXPERIENCE YOU CAN COUNT ON

The most proven indicator of future success is prior performance.

TrackingSystems^{IoT} solution design and delivery experience dates to 1984 with 1,000's of systems successfully implemented to customers exacting requirements.

Tracker^{IoT} has been optimized based on inputs from commercial and government customers and successful deployments worldwide, providing you confidence that your project and system will be successful and optimal.

When you want the best, choose TrackingSystems^{IoT}.
