SMART, SECURE
WEAPONS STORAGE**

AUTOMATE ARMORY OPERATIONS AND PREVENT WEAPON THEFT

CONFIGURABLE WEAPON RACKS

Weapon Racks are configured for a facility's physical dimensions to maximize storage capacity and to optimize the ease of removing and returning weapons. The weapon racks are fully configurable to accommodate any assortment of weapon types and storage requirements.

- 1 Specifically designed fixtures enable the storage of unlimited types of weapons, gear and magazines within a system and within individual storage units.
- 2 Storage racks can be implemented with or without doors, tops and sides
- 3 Storage racks can be placed into gear or electrical mobile storage systems to eliminate unnecessary aisle space for high density storage
- 4 Cabinets can be equipped with Smart Locks with fingerprints and PIN #'s to restrict access to weapons and monitor lock access encounters.

SIDEARM SMART LOCKERS

Sidearm lockers are manufactured of hardened steel with sophisticated, locking systems that prevent unauthorized access to sidearms and magazines. Storage systems include tablet PC's built-in for intelligent storage and access.

- 1 Personnel authentication using ID card, Fingerprint or PIN #, with verification that the officer's ID card / active duty status is current.
- 2 Once an officer is authenticated, LED lights turn green at lockers that hold a weapon that is assigned to the officer or that the officer otherwise has authority to remove, with alerts if expired certifications or 'Do not ARM'.
- 3 Sidearm lockers include optional RFID technology that automatically tracks the removal or return of weapons, linked to the officer's identify.
- 4 Sidearm lockers include optional weighing scales to weigh sidearms upon return to ensure that the magazine has been removed, and, to store and weigh the sidearm's magazines to ensure that there are no missing rounds.

LONGARM SMART STORAGE

Longarm smart storage racks and cabinets are constructed of hardened steel and with heavy-duty locking mechanisms and butt holders to secure weapons in place to restrict access or theft.

- 1 Personnel authentication using ID card, Fingerprint or PIN #, with verification that the officer's ID card / active duty status is current.
- 2 Once an officer is authenticated, LED lights turn green at lockers that hold a weapon that is assigned to the officer or that the officer otherwise has authority to remove, with alerts if expired certifications or the officer has been marked 'Do not ARM'
- 3 Butt holders include optional RFID sensors to automatically detect when a longarm is removed or returned.
- 4 Butt holders include optional weighing scale, to ensure that the magazine has been removed from the longarm upon return.

SELF-SERVICE AND MANNED ARMORIES

WeaponTracker^{IoT} Smart Storage solutions are configured for each customer's exacting storage and technology requirements. With primary objective of efficient and secure weapons storage, and, to prevent removability of weapons if there is a breach of an armory.

- 1 Open racks, closed cabinets and lockers to secure weapons within an armory environment.
- 2 Fully configurable based on physical dimensions and the types of weapons, gear and ammo to be stored.
- 3 State-of-the-art technology including integrated computing, RFID tracking and weighing scales for weapons and magazines.
- 4 Supports access control technology to limit access to armories at doorways or any entry point.
- 5 Scalable for a single location or a country-wide network of armories, with software driven access, security and tracking controls.

EXPERIENCE YOU CAN COUNT ON

The most proven indicator of future success is prior performance.

WeaponTracker^{IoT} weapons management experience dates to 2007 with digitization of the U.S. Department of State's global weapon, gear and ammo system.

WeaponTracker^{IoT} has been further optimized and continually improved based on inputs from global military, police and security organizations.

When you want the best, choose WeaponTracker^{IoT}.
