

REGISTRATION, ACCOUNTABILITY AND SECURITY OF WEAPONS, GEAR AND AMMO

---

# MILITARY WEAPONS MANAGEMENT SYSTEM

Proven armory and warehouse weapons management

# COMMAND CENTER SOFTWARE

WeaponTrackerIoT is your command center for managing weapons, gear, magazines, cases, cartons, boxes, tools, parts and personnel.

- Digitizes armory and warehouse management.
- Software is fully developed and is configured for each customer's exacting data, workflow, tracking, security and reporting requirements.
- Armory management functions can be performed using computers, tablets, smart phones and mobile scanners. IoTWeaponTracker can also transmit alerts to external devices, such as vehicle tablets or personnel phones.
- WeaponTrackerIoT supports barcoding and RFID tracking of serialized items, such as weapons or vests, and increment-decrement (quantity) of non-serialized items, such as boxes of ammo or OC spray.

## ISSUES AND RETURNS

IoTWeaponTracker provides locked-down accountability of shift-turnover Issues and Returns, including:

- Personnel authentication using ID card, Fingerprint or PIN #, with verification that the soldier's ID card / active duty status is current.
- Displays data and photos of assigned and post-required items.
- Displays and verifies that weapon certifications are current and up-to-date, with on-screen alerts if certification(s) have expired.
- Displays and verifies that soldier's status as 'OK to ARM' or 'Do not ARM'.
- Validates transfer-of-custody from armory to soldier by capturing soldier's electronic signature, PIN # or fingerprint.
- Generate unlimited forms and reports related to armory functions, data and compliance with standard operating procedures
- Detailed audit trail historical records of all armory activities.

## INVENTORIES AND MOBILE COMPUTING

- Mobile computing automates and streamlines armory and warehouse tasks, and ensures data integrity of physical weapons, gear and ammo counts.
- Supports mobile scanners, tablets and phones utilizing RFID, barcoding and Bluetooth.
- Supports the management of both serialized objects, like weapons, and, non-serialized items, like boxes of ammo.
- Rapid inventories of all items all-at-once at distances up to 10', including audits that detail:
  - Expected and located
  - Expected and not located
  - Unexpected and located
- Scan shelf barcodes for non-serialized item types for increment/decrement to keep track of current inventory quantities.

## ARMORY MANAGEMENT

WeaponTrackerIoT monitors and keeps track of armory tasks, including:

- Officer ID update
- Weapon certification update
- Weapon cleaning
- Weapon inspection
- Weapon test firing
- Maintenance

- 01 Task due dates and time intervals are monitored, such as 'Due in 30 Days', automatically triggering alerts, messages and calendar updates.
- 02 IoTWeaponTracker also supports advanced workflows where groups of Users contribute to a task and approvals are captured, with all data saved to audit trail records.

# EXPERIENCE YOU CAN COUNT ON

- The most proven indicator of future success is prior performance.
- IoTWeaponTracker weapons management experience dates to 2007 with digitization of the U.S. Department of State's global weapon, gear and ammo system.
- IoTWeaponTracker has been further optimized and continually improved based on inputs from global military, police and security organizations.
- When you want the best, choose IoTWeaponTracker .
